NOTES OF THE WEEK Their Majesties the King and Queen and saite took passage last evening in the steamer

Likelike for the Island of Maul.

The sale of Keanhala Plantation, situated at 15th inst., is unavoidably postponed until Saturday the 22d, at which time, we understand, it will posttively be soid. This sale offers a splendid opportunity to capitalists wishing to embark in sugar culture. At the Royal Hawaiian Theatre, on Satur-

day evening, Snow's London Ghost Show was exhibited to what we regret to say was a slim house. Each week proves how futile and unbusiness-like it is for two parities to run opposition shows in a town so small as Honolulu. Luproll's Circus and Snow's Ghost Show on the same night is just a little too much of a good thing.

THE MURDER AT WAILUKU .- We learn that the investigation into the facts touching the murder of the Chinaman at Walluku, mentioned two weeks ago in this journal, resulted in the commitment for trial of Alonzo Davis, a half-white, and his wife, and a Chicaman by the name of Assm. who are implicated; but what the testimony is upon which these persons have been committed we did not learn. A few weeks will reveal all that can be said upon the dark deed, tall which time it is prudent to waif with patience.

> We welcome His Honor Judge Jones back from his trip to Oliva Walniba, Kausi, whither he went last week to plant olive trees and grape vines on his plantation. We are glad to know that our people are taking a lively interest in the matter of introducing fruits from abroad, and that a spirit of enterprise has taken hold which, if persevered in, will in due time bring forth good results. Every man should remember that "he who causes one more blade of grass to grow is a becefactor," and has not lived in valu. It should also be borne in mind that It is a duty we owe to society to do something while living that will be beneficial to posterity, and that any other course is selfish, soudid and sinful.

THE ROTAL HAWAIIAN THEATRE.-There will be performances at the above establishment, under the nausgement of Mr. A. Wilson Suow, on Wednesday, Tauraday, Friday and Saturday evenings of this week. The performances will consist of the Lon-don Ghost Show, with varieties, which will be changed each night, so as to make the entertainents as attractive as possible. Friday evening's performance will be for the joint benefit of Jacob Fisher, a mative Haswailan, and Edwin Francois, and will be a rare treat. This week will be the last for Mr. Snow, as he intends taking the steamer next week for Australia. We hope our citizens will give Mr. Snow and his company a parting bumper, as they deserve well of our people. Let the Theatre be filled each uight, and send Snow off rejoicing from Honoiula with a pocket juil of spoudalics.

INTERESTING EXPERIMENTS.-Last week some uteresting experiments were tried in our harbor by officers from the Russiau gun boat now here. The experiments alluded to consisted of efforts to remove some coral rock near the northeast corner of the Esplanade wharf, by the explosion of torpedoes or submarine explosives which did most excellent execution. Whether the obstructions were all removed or not we cannot say, nor do we know whether the experiments were designed to do more than merely exhibit the practicability of removing obstructions by submarine explosives of modern invention, the exhibition of which were interesting as well as new to our people. We regret we were not present to witness the experiments applied of so as to be able to give a more satisfactory description of them. rory description of them.

It will be seen by the notice of His Excellen cy the Minister of the Interior in the "By authority" column that he has notified all persons owning ands, which may be required for the purpose of ocating the new reservoir, that he will enter upon and occupy the same whenever and wherever needed for public use, in pursuance of authority con-terred upon him by law. The necessity of an ample supply of water for Honolulu is so pressing that everything must give way to it. The prospect now is, that in a few months the new reservoir will be ompleted and an ample supply of water assured With a goodly supply of water, and the new fire engines under the control of efficient fire-ties, our people should feel a corresponding sense of security; whilst it will also inspire a spirit of improvement that will luduce capitalists to build more houses, which are much needed to accommo-date the growing increase of population.

BURGLARS ABOUT .- On Saturday night last, a family residing on Emma street had a slight scare about half past 12 o'clock. The family had all red to bed and there was no light about the premises. The wife of Mr. Robb, who occupies spartments on the premises was lying awake,
when she heard a noise in the frost room and immediately afterwards saw the flash of a match. By the light of the match she could plainly see a man with a white handkerehief or cloth round his head, was a white or colored man. The lady gave the alarm by screaming which awakened her husband. The hurgiar on hearing the acream fied pursued by the lady and husband, but the rascal was too fleet of foot for them and got away. Our people cannot be too careful now-s-days and should keep their doors and windows fastened at night. It will not do to be too careless or they may have cause to regret heir want of prudence. We mention the above their want of prudence. We mention the above occurrence in order to put people upon their guard in future. Remember that the man who goes out to commit a burglary goes also prepared to commit murder rather than be caught in the act.

> PUBLIC SPIRIT -There are men in every com munity possessed of sufficient public spirit to induce them to make pecuniary sacrifices for the public good. Such men are a blessing to the community in which they live, and yet are too often unknown, because they are too modest to put themselves forward. Such a case came under our notice in Honolaig a few days ago. In the course of our rambles about the city we learned of one individual, a well known citizen, J. I. Dowsett, who has had the enterprise and public spirit, at his own expense, to bring to this Island a fine Hambletonian stallion which he permits the natives to use for the purpose of procuring good stock, free of charge. It is done In this wise. It a native has a good mare which be desires to have with colt, Mr. Dowsett furthe costes to have will core and Dowsett in-nishes the use of the stallion, on condition that the owner of the mare takes the first colt said the owner of the stallion have the next colt. In this way he is supplying a first class stock of horses to the people free of cost. In the same way the same man is now bringing to the Islands a flor breed of Aiderney cattle. This we call true public spirit, and such a man deserves the lasting graft-tude of the people for such exhibitions of a liberal-ity that few pressess. We learn that out of some twenty marce of natives served by Mr. Dowsett's horse Mr. D. has never received any compensation, and that he offers to any native having a good brood mars his horse tree of charge. This he does to assist the native population, and to bring a good stock of horses into the Kingdom. And this we call patriousm.

THE SUFFERING POUR IN SCOTLAND.—Last week, through the personal exertions of B. K. Fyfe, Esq., the sum of \$200 dollars was collected from the citizens of Honolulu, for the relief of the suffering poor of Scotland. On Saturday evening last the Hawalian Caledonian Club had a meeting, at which a resolution was passed unanimously that \$100 dollars out of the funds of the club now on hand be appropriated in aid of the same benevoleut object, thus making the contributions of the Scotchmen and their descendants and others on these Islands to this worthy object 330 dollars, which speaks well for the benevolence of our people here, who can be moved at my time by the god-like feeling of charity to respond to any call made upon them. We may say that the sum of 200 dollars, which was to be forwarded by the steamer on the 18th inst., was almost if not altogether the contributions of Scotchmen and their immediate descendants, and is therefore prais worthy. But we desire to note the fact that a society so young as that of the Hawalian Caledomian Club (about three years old) contributing 100 dollars out of the society's funds, which speaks well for that organization, and proves that it is in a floorishing condition. We wish the Club all success and a large accession to its numbers the present year. At the meeting on Saturday evening at sent year. At the meeting on Saturday evening an election was held and the old officers were all reelected, except where vacancles had to be filled in
elected, except where vacancles had to be filled in
econsequence of members leaving the Islanda. This
was the case in that of the secretary of the Club, Mr. celested, except where vacancles had to be filled in consequence of members leaving the Islanda. This was the case in that of the sceretary of the Club, Mr. J. M. Macdonald, who having left for home some mouths ago, D. K. Fyfe, was elected to fill the vacancy. The officers are; Hon. A. S. Cleghorn, Chief; Mr. Hendry, 1st Chieffain; D. K. Fyfe, Secretary; H. E. Melntyre, Treasurer. The minor officers will be announced at the next stated meetThe Angel of Death has been muking sad

nroads upon some of the most consplcuous of the native race on these Islands within a few months past. A short time ago, the relatives and friends of William L. Mochonna followed the remains of that good citizen and prominent representative man to Koolaupako, Oahu, advertised to take place on the their last resting place; and now another wellknown and much esteemed representative man of the race has passed over that bourne from whence no traveler returns. On the 18th of the wastee no traveler returns. On the 18th of the present month Governor Kipi breathed his last at Hilo, Hawail, after a brief illness of but a few hours. The late Governor Kipi was one of a class of native men who was born a gentleman, and who maintained a blameless life, so far as we can ascertain from those who knew him. He was at his death Governor of the Island of Hawali, in which posi-tion he conducted himself honorably and well. He was also at different periods a member of the House of Representatives, in which capacity he also distinguished himself for uprightness and a manly course of conduct. He was about 52 years of age when he died, but looked much older than that, if one was to judge from the color of his hair, which was actually white. He was tall, stender, and well fashioned in body; had a pleasant expression of countenance, in which was mingled sminbility and benevolence. Whilst in unner and bearing he benevolence; whilst in manner and bearing he carried about with him the air of a genuine gentle-man. The death of such men as the late Governor Kipl is a real loss to the Kingdom and the race of which he was an honored representative. Peace to his ashes.

> CIATION.-The members and friends of this organization met on Saturday evening last in the large room in Williams' building, which is now being fitted up for the use of the association. Considerable business of importance was transacted, and it is now certain that this organization which is de-signed to meet an urgent and growing want of this community will soon be in full and successful operation. We understand that several liberal operation. We understand that several ideral donations of books and periodicals have already been received, and that various parties of influence and means have made promises of further material aid. At the meeting on Saturday evening a committee was appointed to nominate at the next meeting the names of nine directors, who when elected will complete the permanent organization, the other officers having been already chosen. It was also decided to hold or Saturday evening next a formal public opening of the rooms, on which occasion the Library and Reading Room Association hope to have the pleasure of seeing a large attendance of their friends, both ladies and gentlemen. A committee consisting of Messrs. John Nott, E. Vandoorn and J. S. Smithles has been appointed to make the arrangements for the proposed opening, and we are assured that no pains will be spared to make the occasion an interesting and enjoyable one to all who may be present. To arrangements are not yet complete but we are authorized to say, that there will be short addresses from a number of our prominent citizens, that Mr. Berger has volunteered to take charge of the musical arrangements and that there will be excellent vocal music provided by the Honolain Iron Works Glee Club under the leadership of Mr. P. Jones. Further particulars will probably be announced in the Advertiser on Saturday.

St. Patrick's Day.-Monday last, the 17th inst., was St. Patrick's Day. It passed off in Honolulu more quietly than any other place we have ever been in on such occasions. The fact is we did not notice a ripple on the surface of society, nor did we see " a sprig of shillaleh or shamrock so green " all day. This is to be accounted for from the fact that there are fewer sons of Erin's Isle in Honolaid than any city of its size we have ever visited, and hence the reason the day passed off without any demonstration whatever. We will say this much, however, that if history speaks the truth, St. Patrick or Ireland's patron saint deserves grate-St. Patrick or Ireland's patron saint deserves gratetul remembrance, not only from Irishmen but from
the good of every land. The illustrious St. Patrick
was famed for doing good while on earth, and why
should not his memory be cherished by the good
men of all agres, creed and nations. For our own
part we have always from our youth up felt a
reverence for the character and life work of the
great apostle of the Roman Catholic Church.
St. Patrick, among other good works, is said to
have banished the snakes and toads from Ireland.
But whether this tradition is true or not one thing
is certain that there are neither snakes nor toads or is certain that there are neither snakes nor toads or any other reptile in all Ireland. But this is not all. is a fact that beither snakes por toads can live in Ireland. The experiment has been tried time and agair, but always failed from some cause not yet explained. We remember to have seen it stated by some malicious fellow who had no love for Ireland some malicious fellow who had no love for Ireland or Irishmen, when speaking of St. Patrick driving the snakes and toads from Erin, that he (St. Patrick) "drove the snakes and toads out of the land and into the people." This we believe to be a malicious slander of course, because we know in fact it is proverbial that the Irish people, with all their impressiveness, are the most kind hearted and generous of any people on the globe. We have even found it so in our own experience, and therefore have a warm side for an Irishman wherever we meet him.

IMMIGRATION .- On Saturday morning the 15th inst., there was a meeting of gentlemen connected with the Chamber of Commerce of this city, and others interested in the question of procuring laborers for the industries of these Islands from Hon, Godfrey Rhodes, with H. L. Sheldon, Esq., acting as secretary. Mr. Rhodes stated the object of the meeting to be, to consider the most favorable methods of obtaining tuborers from India, and onsmuch as Mr. Horn, a gentleman from Magri tius was present, he requested that gentlemen to favor the meeting with such information as he thought necessary. Mr. Rhodes read at the same time a series of questions which he had committed to the paper. Mr. Horn took the questions, and after stating that he thought the best way would after stating that he thought the best way would be to furnish him with a list of such questions as the meeting wished him to auswer in writing, and he would willingly answer them in writing, and he would willingly answer them in writing. However he (Mr. Horn) was willing and did proceed to answer the inquiries on the memorandum in a very satisfactory manner. The Hon, H. A. P. Carter, our late Envoy to Grest Brilain, made a statement in which he gave the substance of the experience he had while abroad on the subject of obtaining laberers from Iudia, and wound up by declaring it as his opinion that the altempt would be a failure, unless at least from two to four hundred thousand dollars were raised and expended, and even then dollars were raised and expended, and even then be believed that the thing was impracticable, owing to the difficulties which would be placed in the way by the Indian Government and people, both of whom are averse to the migration of the coolies to any other countries; and especially so far removed from India as the Hawaiian Islands. Mr. Carter gave it as his opinion that this Government must look to Madeira, and the Portuguese Islands, for the laborers needed to supply the demands of the planters. After a desultory discussion, in which several gentlemen participated, or matter o Judge Widemans the meeting adjourned tomeetfat the same place one week hence, at 11 o'clock A. M.

ed on Saturday night last, but by no means as well as when first opened. The people would like to pat-ronize the circus; but the fact is, two entertainments a week, with matinees thrown in, is just a little too much, and the people can't afford it. There is such a thing as milking a good cow dry, said we thin our showmen will find it so crolong. It is reall supprising the progress the native riders in the circus are making. Every evening they show improvement, and in a short time, with careful train ing, will compare lavarably with the professionals of the sawdust ring. Notive Hawaiians take to horseback riding as naturally as they do to water; and as divers, swimmers and water dogs they are unrivaled.

Hichard Henry Daus, poet and e-sayist, died at Boston on the 2d inst., at the advanced age of cinety three years. He was a member of the Massa-chusetts bar, devoted himself entirely to literary pursuits, and was associated during his long oureer with many of the most widely circulated magazines and newspapers, to which he was a frequent contributor. A collection of his various poems and evays have been issued in book form, and the polished diction and style evinced by them will ensure them a high place amongst the classical literature of our

The Liverpool Mercury says that a noteworthy in-stance of commercial murality is announced by Peter Bancroft, of that town, who recently received an un-eigned letter, in which was sentoned a bank-note for £1008. The only information vouchsafed by the ensier was that the bank note was the amount of an old debt and accumulated interest, which he was sorry not to have been in a position to forward to Mr. Bancroft hefure. Mr. Bancroft he not the slightest idea from whom he has received the conscience

The Black Plague in Russia.

London, Pebruary 3.—The origin of the plague in Russia is thus given: A Cossack returning from the war to Welfianka brought his lady a shawl, which she wore two days, then sickened, with all the symp toms of the plague, and died. In the following four days other members of her family died. The disease spread rapidly, the local authorities not paying any attention to it till half the inhabitants had died and the remainder were unable to bury the victims. Then, when the epidemic had assumed serious dimension. energetic means were taken for preventing its spread-ing, and strict quarantines were established, first in the towns and villages, shutting off the streets where the plague reigns from the rest of the place, and secondly by surrounding the villages with troops, so that nobody is allowed to pass in or out. The panie in Russia is almost incredible. Every class and station in life has petitioned for an entire cessation of all intercourse. Every portal of communication between the Volga districts and the rest of Russia is stopped, and letters sent from Astrakan and Zarit stopped, and letters sent from Astracan and Zaritnin are not received by persons to whom they are addressed. Some people even reture to take papar
money, fearing that the germ of infection might be
communicated through it. It is almost impossible to
describe the terror which has taken possession of the
people. The Russian Sanitary Commission propose
to their off the Value line all in the people. to shut off the Volga line from all intercourse Western Russia and permit communication only under quarantine. Russian railway cars are not ad-mitted to German territory. The export of grain from Poland will suffer severely from this rastriction. The Roumanian Government is discussing the expe-diency of probibiting the transit of Russian provis-ions sent to victual the Balkan army. HONOLULU LIBRARY AND READING ROOM ASSO-A dispatch from Paris reports that special precau-ions against the plagae are being taken at Mar-

eilles and other southern points. St. Paraussung, February 1 .- The Committee of Ministers have resolved that the Minister of the In-terior be empowered to burn Williamka and other rillages necessary, the inhabitants to be removed elsewhere within the quarantine district; troops to enforce quarantine to be placed at the disposal of the civil administration. A delegate will be dispatched to Astrakhan and neighboring governments with power to adopt extraordinary measures. He will be eccompanied by a medical commission to investigate

accompanied by a medical commission to investigate the cause of the epidemic.

The Official Messenger says: The Governor General of Muscow contradicts the reported appearance of the plague in a vilinge near that city.

It is stated that Professor Bockin, physician to the Cara, advises the burning of Wetlisuka and other villages where the epidemic has broken out, together with all furniture in them, and the removal of the with all furniture in them, and the removal of the inhabitants to healther places. In spite of the heavy expense such a scheme would involve, the Czar is said to be disposed to follow Professor Botkin's advice.

Six more persons have been attacked by the plague

at Selitrimo. The Czur has ordered General Melikoff to start immediately for Astrakan with full powers. He is appointed Governor General of the plague stricken districts, which are created into a ovince during the continuance of the enidemic. VIENNA, February 1.—An imperial ordinance, identical with that of Germany, prohibits the importation of a large number of articles from Russia, and orders the disinfection of all arrivals therefrom. The Galician authorities memorialize the Government for an immediate establishment of a cordon against Russia.

The Presse says: Austria is about to issue an order

forbidding travelers from Russia to cross the frontier unless provided with passes from the sanitary authorities. The Porte announces that all Russian ports will be

quarantined against all Turkish ports on the European coast of the Black Sea. The East Roumelian Commission has proposed the same measure along the coast from Kustendje to Bourgas.

Roumania has decreed upon a similar course in the delta of the Danabe and east of the Dobrudska and has issued regulations identical with those with these and has issued regulations identical with those put in force by Austria in regard to traffic and the im-portation of goods across the Russian frontier.

Buntan, February 3 .- An imperial decree has been published establishing strict passport regulations be-tween Russia and Germany after February 16th. Every traveler before entering Germany must prove that he has not been in a suspected or infected dis-trict within twenty days. All clothes and baggage must be disintected.

The Berlin Government, to prevent the introduction of the plague, has prohibited the introduction of all articles prohibited by the Austrian Committee, and also all manufactures of feit. The Imperial Chancellor will draw up regulations relative to travelers' baggage. The Sanitary Commission of the Soneldt quarantines all vessels from the Black Sea. It is considered in heat-in-productions and the season of the seas considered in best-informed quarters that the present decrease of the plague is merely due to the extreme cold, and consequently the precautions against its spread are unrelaxed.

spread are unrelaxed.

According to an investigation made by the German Board of Health the plague has existed in Astrakhan since May, 1877. Even the paper money in the district has been ordered burned. BUCHAREST, February 4 .- A regiment of troops has started from this place and one from Galatz for the formation of a sanitary cordon on the Bussian

Rio January 29 .- The mortality from the black plague in the province of Cears has decone-half since last report.

Keaahala Plantation

AT AUCTION.

At 12 o'clock M., at Salesroom, will be sold

THE ABOVE PLANTATION, WITH STOCK, BUILDINGS, ETC.

This Plantation has a growing crop of 125 acres, 50 acres ready to grind. The whole number of acres that have been planted, is 148. This can be increased to 200. More than 100 acres can be irrigated. A new mill was erected that year. The buildings are mostly new, having been erected within the last 15 months. There are sioes carts, and all the improvements to carry on the plantation. The place is fooced. The site, as a residence, is pleasantly situated—elimate nosurpassed. Work can be conducted easier than on most plantations. The present owner is compelled to part with 15, not from choice, but from necessity.

cessity.

For further particulars, apply to C. E. Williams, on the plantation. Plans of the plantation, with photographic views, may be seen at Salesroom, and full information

M. J. ROSE,

HAVING JUST TURNED OUT A PINE Wagonet for HIS MAJESTY KING KALAKAUA. Wagonet for HIS MAJESTY HING KALAKAUA. and no newspaper man or reporter having said one word in regard to it. I shall, therefore, blow my own horn. It is only recently that Carriages have become so common that almost every householder has got one.

IN THE SCREPTURE CARRIAGES, or Charlots, are frequently alloded to. Upon the flight of the Excaelles from Expyt, King Pharaob pursued them with his Hundred Charlots, all of which were swellowed up by the waters of the Red Sea. And when Israel made up his mind to pay his sun Joseph a visit, Joseph telegraphed the old gentleman to come down in Geshen and he would meet him there and drive him down to Egypt in a Jagger (wagon).

Charlots and Carriages were the said one word. eagon). Charlots and Carriages were mostly used by Kings and

The Greeks and Romans and Controls, but attange to any, it was so into as the sixtenth ecotury, in 1500, that Cartiages were introduced but Prance, and at that date only three were known in Parls, then quite a large city.

M. J. ROSE is now prepared to furnish amoust any kind of vebicle that may be ordered of him: I has got some of the Best Suilled Mechanics that can be had in any country. Also has received a large invoice of ALL KINDS OF STOCM, such as Hubs, Spokes, Fellors, Shafis, and one
